V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims <u>1-10 AND 16-26</u>	YES
	Claims <u>11-15</u>	NO
Inventive Step (IS)	Claims <u>1-10 AND 16-26</u>	YES
	Claims <u>11-15</u>	NO
Industrial Applicability (IA)	Claims <u>1-26</u>	YES
	Claims <u>NONE</u>	NO

2. citations and explanations (Rule 70.7)

Claims 11-15 lack novelty under PCT Article 33(2) as being anticipated by Awaya et al.

Awaya discloses morphan derivatives. The compounds no. 1, 3a and 3b on page 536 of Awaya anticipate the instant claims and therefore, are detrimental to the novelty of the instant claims.

Claims 11-15 lack an inventive step under PCT Article 33(3) as being obvious over Awaya et al.

Awaya discloses morphan derivatives. The compounds 1, 3a and 3b of Awaya anticipate the instant claims and therefore, are detrimental to the inventive step of the instant claims.

Claims 1-26 meet the criteria set out in PCT Article 33(4) for industrial applicability.

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

Please See Extra Sheet.

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

☐
☐

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION WAS LACKING

This ISA found multiple inventions as follows:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1. In order for all inventions to be searched, the appropriate additional search fees must be paid.

I. Claims 1-5 and 23, directed to compounds of formula (I) and a method of using them, classified in class 546, subclass 229+.

II. Claims 6-10 and 24, directed to compounds of formula (II) and a method of using them, classified in class 546, subclass 79+.

III. Claims 11-16 and 25, directed to compounds of formula (III) and a method of using them, classified in class 546, subclass 112+.

IV. Claims 17-22 and 26, directed to compounds of formula (IV) and a method of using them, classified in class 546, subclass 192+.

The inventions listed as Groups I, II, III and IV do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

There is no common core which in the Markush Practice, is a significant structural element shared by all of the alternatives ; see PCT Administrative Instructions Annex B Part I (f) (i) (B) (1).
